Innovation in government is happening now

The Better Government Movement has been crowdsourcing and tracking where innovation is currrently happening in government. Ranging from agency specific initiatives to Think Tanks, the Ecosystem Map can connect you with the innovation you are looking for. Please see below for information on the types of innovation included in the ecosystem, how to navigate the data, and how you can share your innovation stories today.

Types of Innovation

Join the Better Government Movement

The Better Government Movement was officially launched with a series of human-centered design workshops in March 2017. Throughout 2017 the Community of Practice will collectively build a toolkit and create strategies to amplify and evangelize innovation across the federal government.

Innovation.gov and the Better Government Movement is a crowdsourced, open source movement brought to you by the **General Services Administration**, and built by hundreds of innovators across the Federal government.

We're from the government, and we're here to help.
